Question 1: (8 Marks)

For the online booking system, write down the user and system requirements

Question 2: (7 Marks)

For the food delivery mobile application, the nonfunctional requirements and the system stakeholders

Question 3: (8 Marks)

Draw the activity diagram for electronic health record systems

- Manage comprehensive patient records including diagnoses, treatments, and medications.
- Enhance care coordination and improve operational workflows.

Question 4: (7 Marks)

Draw the use case diagram for library management system

A library management system (LMS) is software designed to automate and manage all functions of a library. It helps librarians efficiently maintain records of books, journal subscriptions, user memberships, book circulation, and fines, improving organizational efficiency and user experience.
